EARTH CONSTRUCTION & ENGINEERING, INC., Contractor

Items #11 and 12
There are two different types of backfill material in our specifications:

(1) Special Backfill is nothing but "b" Borrow or Bankrun Gravel
(2) #53 or #73 Special Backfill as stated in our specifications can either be gravel or stone backfill.

The #53 or #73 special backfill costs more and hence, better material than bankrun gravel. However, in this project, #53 or #73 was incorrectly estimated. Since the specifications does state that "all sewers installed under improved streets and running parallel with the streets, shall have special backfill ("b" borrow) and sewers installed across an improved street shall have #53 or #73 special backfill." Therefore, this Change Order is to correct this situation and hence, special backfill quantity is being increased and #53 or #73 special backfill is being decreased. However, special backfill has been increased comparatively higher than #53 or #73 special backfill. This is due to the fact that in order to save approximately 50-60 large size trees on Windsor Road, Lateral #2, the proposed sewer was moved under the existing pavement. This constitutes additional special backfill which was not previously estimated under either of the above items #11 or 12. The end result is still a savings in cost since special backfill is a cheaper material. The remaining #53 or #73 special backfill shall then be used for street crossings and street subbase for restoration.

Item #23
Additional field tiles were encountered which neither of the parties had any knowledge of their existence. They were installed by farmers, property owners several years back.

Item #33
Due to fluid ground conditions along Cook Road, additional base stabilization was required.

TITLE OF ORDINANCE Change Order #1, 314-80, Phase I, C-180599-06, Hollywood Gardens

DEPARTMENT REQUESTING ORDINANCE BOARD OF PUBLIC WORKS 8-81--11-60
